

Nextgen and Ixia signs Reseller Agreement.

Nextgen, Inc. (head office: Minato-ku, Tokyo. President Shinji Onishi, hereinafter NextGen) announced that Reseller Partner alliance for Ixia Visibility products including Net Tool Optimizer (NTO) and NetOptics products has been signed with Ixia (Corporate office: Calabasas, CA. CEO Bethany Mayer).

Henceforth, Nextgen will offer diverse and integrated solution with Nextgen's NX-C6000 and Ixia's NTO and NetOptics.

In recent years, Voice over IP network tremendously expanded, not only in fixed lines, VoLTE, OTT VoIP(*1), cloud PBX, and VoIP phone. On the other hand, the telephony network is placed from private network to open IP network and therefore extraordinary cyber-attacks are noticeable. Over the 8 years, Nextgen has provided the countermeasure of VoIP security threats based on the research, development, and knowledge of cyber-attacks and telephony network.

Nextgen is providing industry's unique IDS and forensic systems designed for VoIP network mainly to telecommunication carriers. With integration of NX-C6000 and Ixia's NTO and NetOptics products, Nextgen offers:

- ◇ Safe Network visibility without influence of service network
- ◇ Increase performance: reduce CAPEX/OPEX
- ◇ Expand auditable network bandwidth
- ◇ Scalability and redundancy function

Nextgen entered into Ixia's technology partnership program as the first company in APAC in June of 2014(*2). The new Reseller Partnership will co-operate not only in technical aspect but also sales, with the vast range of solution provisioning. Thus far as security's corrective action, NTO and NX-C6000 integrated solution have been introduced primary to telecommunication carriers. From this point forward, the strength of NX-C6000 will be utilized with the integration of Ixia's carrier-grade solution. Nextgen will accommodate security countermeasure, monitor demands in non-VoIP network, and make a great effort for clientele.
